

Sumitomo Heavy Industries
Environment Co., Ltd.

Certificate

Product Name Surface Salinity Meter
Model SSM-21P
Manufacturer DKK-TOA CORPORATION
Test Report No. KKEA9008

The Model SSM-21P manufactured by DKK-TOA Corporation was tested to evaluate equivalence for measuring the level of contamination of soluble salts on surfaces in comparison to the Bresle method as defined by ISO 8502-9 under NACE Standard SP0508-2010.

The measurement results obtained from the Model SSM-21P were deemed equivalent to those obtained by using the Bresle method.

Hence use of the Model SSM-21P is equivalent to ISO 8502-9.

Date : 21st Feb. 2011
